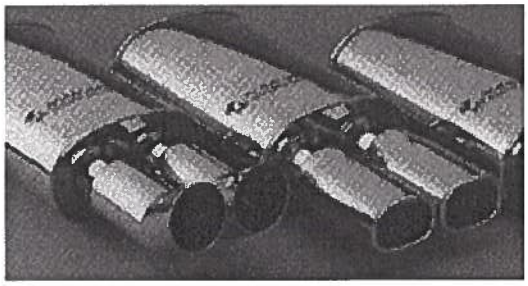
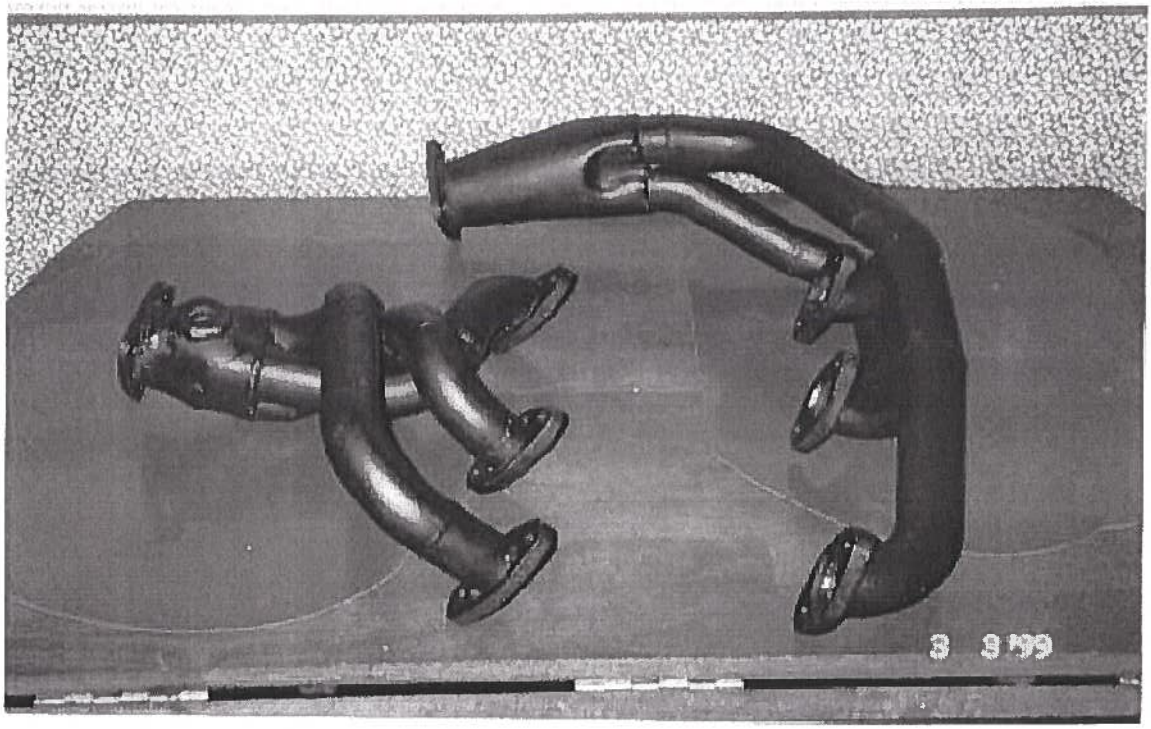
Exhaust



Borla is one of the leading manufacturers of performance exhaust systems. Borla makes a kit for the Chevy Monte Carlo that will fit W-body cars as well. Although a bit pricey, you cant get better quality than Borla.

Youll always hear a debate about which mufflers to go with, I have a set of twin chamber Flowmasters in place of the stock mufflers. Im not goin for power, so i dont want to spend alot of money on mufflers. Im looking for the sound i get. It probably wouldnt hurt to get a new cat-back system installed, maybe a custom job from a local muffler shop, and maybe do away with the wimpy exhaust splitter. For now im satisfied with the low rumble i get and the throaty groan at 2100 rpm.

This company specializes in high quality headers. They currently have a line for RWD 2.8's and 3.4's.



Steve Hamm produces headers for 2.8 and 3.1 vehicles, cost is around $650. Email him at oneqik6@mailcity.com.

Product	Jegs Part #		Vehicle	Year	Engine	Notes	Price
